

BONES FILMS

BONES X-RAY 35mm

EXPERIMENTAL BLACK & WHITE FILM

MADE IN BRAZIL

EXPERIMENTAL
FILM
FOR A
BRIGHTER
DARKER WORLD.

PACKAGING

Supplied in silver foil zip-lock packaging.

OVERVIEW

Bones X-Ray 35mm is an experimental black-and-white film made from x-ray material and converted for 35mm still cameras. It is intended for creative and experimental use and can be exposed across a broad range, approximately ISO 100 to ISO 3200 depending on the desired look and processing approach.

FORMAT & TYPE

Format:	35mm / 135
Type:	Black & White
Nominal Exposure Range:	ISO 100 – 3200
Frames:	24 exposures
Origin:	Brazil
Packaging:	Silver foil zip-lock bag

DEVELOPMENT

Can be processed in standard black-and-white chemistry using appropriate development times.

EXPOSURE EXAMPLES

ISO 400

ISO 800

ISO 1600

ISO 3200

IMPORTANT HANDLING NOTES

- Recommended for experienced users and experimental shooting; not ideal for general retail use.
- Film base is thick and tightly wound; reliable transport may require a strong camera advance mechanism.
- For best transport, hand-advance the film through the first several frames before normal shooting.
- Load in complete darkness or very subdued light. The film is prone to light piping.
- Handle carefully during processing, as the film scratches easily.
- Emulsion is coated on both sides.
