# Svema FN-64

## Black & White Negative Film

A classic panchromatic black & white negative film with fine grain, high sharpness, and excellent infrared response—ideal for fine-art and technical photography.

### OVERVIEW

Svema FN-64 is a panchromatic, high-resolution black & white negative film designed for photographers who value detail, tonal clarity, and versatility.

### KEY CHARACTERISTICS

- Panchromatic high-resolution black & white negative film
- Transparent polyester base for excellent dimensional stability
- Base thickness: 0.10 mm / 0.004 in
- Protective top layer helps resist scratches
- Anti-static base and back layer retain their properties after processing
- Very fine grain and high sharpness
- Suitable for fine-art photography and technical detail work
- Original factory packaging

### INFRARED SENSITIVITY

Extended sensitivity into the near infrared, up to 750 nm.
