High contrast

RED SENSITIVITY
Heightened red sensitivity

Photo by Mark Dalzell

OVERVIEW

Svema Foto 400 is a high-speed black-and-white camera film suitable for both outdoor and indoor use. It excels in low light and challenging lighting conditions thanks to its wide exposure latitude and high contrast. With good separation of green shades and heightened red sensitivity, it is a strong choice for landscapes.

HIGH SPEED
ISO 400 / 27°

WIDE LATITUDE
For difficult lighting

HIGH CONTRAST
Strong tonal punch

LANDSCAPE FRIENDLY
Good green separation
